Foreword

The 7th edition of ICEEM continues its international and collaborative character, this time being organized by the “Gheorghe Asachi” Technical University of Iasi, Romania and the Vienna University of Technology, Austria, in close cooperation with the Environmental Biotechnology section of the European Federation of Biotechnology (EFB).

This ICEEM edition seeks to bring together researchers, practitioners and specialists in various environmental fields, with a strong focus on integrating cutting-edge environmental technologies with efficient management practices, contributing thus to a sustainable future.

Like before, ICEEM 07 strongly encourages contributions that focus on innovation, multidisciplinary and cross-sectorial approaches related to environmental issues.

Furthermore, the ICEEM conference welcomes contributions of young and senior scientists, and at the same time it encourages practitioners and specialists in various environmental fields to add a more practical-oriented approach to the conference sessions.

We hope that the seminars, workshops, plenary sessions and side-events of ICEEM will enhance multidisciplinary, international cooperation and effective communication of scientists, engineers and managers.
