### **Abstract**

Waste is a component of human life, therefore is inevitable. The great hazard that is prevalent in our country is the fact that some types of waste are stored together with hazardous industrial waste. This is why the Agency of Environment Protection is focusing on managing waste efficiently in Brasov area.

This way all the main contributors like the mayor's office have their attention on, and want a resolution (even partial) to the most important adopted measures until 2007.

*Keywords:* waste, environment protection, waste management.
